

Please protect Social Security.

So many of us depend on it. I, for one, have very limited investments.

I entered the convent after high school and worked with delinquent youth with the Sisters of the Good Shepherd. When I left there I worked with Juvenile Court and the police dept. in both probation and social services.

From there I was recruited to teach religion, and have been in Catholic Education ever since. I'm describing the years from 1962 to 2009.

It is a known fact that those of us in the service industry are much lower on the pay scale than many other "careers", and even though I CHOSE this road, I feel that it is unfair to be penalized due to others' mismanagement of these funds.

I would strongly suggest that our political leadership work together to enhance rather than to reduce the amount of social security funds received by our seniors who have worked so hard to build this country of ours.

Please protect our Social Security.

God bless you.
